

Looking for Containers that Can Handle Any Handler?

**Unifuse®. Built Extra Tough.
Engineered to Last.**

Unique, Patented VIM Plastic Molding
Makes Our Plastics Nearly Indestructible.

- Low-cost tooling and quick turnaround
- Unrivaled ability to modify on-the-fly
- Tier-one provider
- Made in the USA

Go ahead, treat us as rough as you want – our patented Vibrational Molding (VIM) process delivers supremely durable and endlessly reusable polyethylene products – offering lower mold costs than any competitor.

Unifuse has 25 years of experience servicing the material handling, food service, and health and hospital industries, with standard and custom equipment. We provide prototypes, modifications and production in short lead times. Need something special? Our unique process makes even “impossible” designs possible.

Don't monkey around with anything less. Call on Unifuse to solve your toughest material handling challenges.
